Agrovista Grow Crop Gold

Following on from the successful launch of the Agrovista Oilseed Rape Platform sites in November we are pleased to invite you to a spring technical update.

The agenda will cover the latest HGCA work on rotational management and insect pest management in the rape crop. Simba and Vaderstad will be discussing how different establishment methods have influenced the crops winter survival. We will also be examining crop nutrition strategies.

We will be following a standard agenda, common to all dates and venues:

10.30 Arrive / Coffee
11.00 Meeting commences
12.30 Lunch break
13.15 Meeting resumes
14.30 Finish

Details of the sites and contacts are listed below. If you would like to be involved in your local group please contact your local co-ordinator:
