PRONTO EX

PRONTO EX

Our **strongest** ever 3m range

The first 3-metre mounted drill offered by Simba Horsch, the Pronto EX completes an impressive line-up in this sector including the Pronto DC and Sprinter trailed drills, the X-Press (with or without ST Bar) and the widely acclaimed DTX 300.

Greater manoeuvrability - higher productivity

As a mounted 3-metre drill, the Pronto EX is exceptionally manoeuvrable in, around and between fields and can be reversed easily into tight corners. When turning, headland compaction and smearing is significantly reduced.

More efficient use of tractor power

The Pronto EX, with its 'close-coupling' point, can also be towed and moved by the same small tractor (115hp -130hp). Other 3m drills can be towed by tractors of 100 -110hp, however, they are not big enough to lift the drill, so a much larger tractor has to be utilised. This, in turn, can increase fuel consumption.

Ideal for all conditions

The new machine comes with a choice of standard TurboDisc units featuring an in-built packing system with maximum coulter pressure of up to 120 kg per disc.

Quality cultivation, levelling and drilling

The Pronto EX features a standard arrangement of a 1500-litre hopper and is equipped with two rows of cultivation discs as used on the larger DC models. This package delivers consistent, high quality results in terms of cultivation and levelling. The drill functions are controlled by the advanced Drill Manager ME.

Specification

- 1500L hopper
- Drill Manager ME Control System
- 20 TurboDisc coulters
- Tyre packer
- Bout markers
- Direct drive hydraulic fan
- 2 rows of cultivation discs
- Following harrow

Options

- Pre-emergence markers
- Seedflow monitor and sensors on all coulters
