

# PRO-EDGE

## The **NEW** ST point from Simba. At the leading edge of point design

Developed jointly by Simba and Bourgault, specialists in the manufacture of soil engaging components, the new and innovative **PRO-EDGE** takes point performance to a new level. The only point specifically designed for use with Simba's ST tine, it outperforms the competition in all the aspects that really matter.

PRO-EDGE OFFERS YOU A HOST OF BENEFITS.

- Longer lasting - **PRO-EDGE** lasts up to 50% longer than other ST points
- Lower rate of width reduction - retains full working width for much longer
- More even longer-term wear - results in less wastage when point is worn out
- Precise fit to Speed-Loc™ adapter - not too loose, not too tight, but just right - every time
- Application and tine system specific - the best possible design for the job

ALL THIS ADDS UP TO:

- Substantial reductions in cost per hectare

With **PRO-EDGE** you can expect a longer working life, less downtime, less wear on associated parts and a precise fit - ultimately **SAVING YOU ££££** over the life of the product.

TOGETHER WE'RE EVEN STRONGER

# PRO-EDGE

## Unique features that really make a difference

### SHARK FIN CUTS THROUGH CLODS

This feature prevents excess soil riding up the tine as well as protecting the pin in the Speed-Loc™ adapter

### FITS PERFECTLY AND CONSISTENTLY ON TO THE SPEED-LOC™ ADAPTER

Four pads inside the stem ensure a perfect fit on to the Speed-Loc™ adapter. This reduces adapter wear and maintains a consistent

working depth. Other points don't fit as snugly causing premature wear, variable operating depth and ultimately failure of the adapter or even the complete tine.

### QUICK AND EASY TO FIT

A unique recess in the underside of the PRO-EDGE point enables it to be driven onto the Speed-Loc™ adapter quickly and easily, without damaging the specially designed leading edge. Removal is even quicker - simply depress the nipple with the Point Removal Tool and knock the point off.

### ADD ACRES TO THE LIFE OF THE POINT

Attention-to-detail in the design of the PRO-EDGE point enables carbide tiles to be added to the leading edge, adding even more acres to a lifespan that already exceeds other points on the market

### IT HAS TO BE PRO-EDGE

Longer lasting, greatly reduced wear, lower cost per hectare and the perfect match for the Speed-Loc™ adapter, there is no point in choosing anything less. It has to be PRO-EDGE.

### FIND OUT MORE
